Skills

NodeJS

TypeScript / JavaScript

React

E2E Testing

NextJS

GraphQL

CSS and styling

SQL

Hobbies

Enjoy playing guitar, hiking, building side projects, spending time outdoors, and reading.

Summary

I'm a Fullstack Engineer with 10+ years of experience building responsive, user-focused web apps. I work across the stack with TypeScript, JavaScript, React, Node.js, SQL (Postgres), and GraphQL. My background in UI design helps me craft polished interfaces, and I build reliable, well-tested APIs and backend systems. Projects include [assured.claims](#), [trailhead.salesforce.com](#), [opentable.com](#), [upstart.com](#), [assured.claims](#) and [blend.com](#). Open to remote roles.

Employment History

Staff Engineer, Assured, Remote

September 2023 — Present

- Building a mobile web app for high volume user data intake (questionnaire interface with photo and video uploads)
- Building a backend web application for insurance adjusters to manage claims, handle data uploads, and streamline the entire workflow
- Working full-stack with Node.js, TypeScript, Express.js, and Web APIs
- Designing and developing scalable APIs and backend services on AWS
- Implementing feature flagging with LaunchDarkly and secure infrastructure access with StrongDM
- Writing end-to-end and unit tests to ensure high code quality and system reliability
- Contributing in a fast-paced, high-growth startup environment, delivering production-ready features rapidly
- Technologies
 - Typescript
 - React
 - Postgres
 - GraphQL
 - Nexus
 - Prisma
 - FFMpeg
 - OpenAI
 - Other: LaunchDarkly, StrongDM, Doppler

Lead Frontend Engineer / Engineering Manager, OtterTune, Remote

May 2022 — Present

- Technical lead for v2.0 rebuild project
- Hands-on coding and code reviews
- Facilitated stand-ups and engineering syncs
- Collaborated with Design and Product for engineering clarity
- Provided technical recommendations and guided team architecture decisions
- Technologies:
 - React
 - Redux
 - Typescript
 - Vite
 - Cypress / E2E, Jest

Senior Software Engineer, Blend, Remote

March 2021 — April 2022

- Developed features for Blend's loan and CRM platform
- Built UI for loan officers to manage mortgage processes
- Worked across the stack on various projects (Node.js, Express, MongoDB)
- Technologies:
 - TypeScript
 - Node.js
 - React, Redux, React Query
 - Express
 - MongoDB
 - CSS / Sass
 - Responsive Design

Senior Software Engineer, Salesforce, San Francisco / Remote

March 2016 — March 2021

- Designed and built the foundational architecture for Salesforce's Trailhead editor and publishing platform
- Led development of **Trailmaker**, the MVP editor and publishing tool for Trailhead
- Successfully launched **Trailmaker** at **Dreamforce 2017**, one of Salesforce's largest global events
- **Trailmaker** is now a core platform used by top global brands to create and publish learning content
- Contributed to the development of Trailhead's **SuperBadge** product, expanding Trailhead's credentialing and certification ecosystem
- Technologies:
 - React, Redux
 - TypeScript
 - Express
 - Postgres
 - Ruby on Rails
 - Responsive Design

Senior Frontend Software Engineer, OpenTable, San Francisco

August 2015 — February 2016

- Developed core features for OpenTable's restaurant listings service (JavaScript, Node.js, Express)
- Built and launched numerous A/B tests using Optimizely and internal tools to drive front-end optimizations
- Implemented load testing simulations to improve system performance during peak traffic seasons
- Technologies:
 - JavaScript
 - Node
 - Express
 - Optimizely

Front End Developer, Upstart, Palo Alto

February 2014 — April 2015

- Sole front-end engineer at a fast-growing startup, collaborating directly with founders and lead designer
- Delivered major UI features and improvements in a fast-paced, high-ownership environment
- Technologies:
 - JavaScript
 - Ruby on Rails
 - Heroku
 - CSS / Sass

Front End Developer / UX Designer, Dominion Enterprises, Norfolk, Virginia

December 2010 — January 2014

- Developed front-end for multiple Dominion employment portal websites
- Built Dominion's first fully responsive, redesigned employment portal
- Introduced JavaScript unit testing practices to improve code quality and reliability
- Technologies:
 - JavaScript
 - Ruby on Rails
 - Backbone.js
 - jQuery
 - CSS / Sass
 - HTMLjQuery

Web Developer / Designer, bmace.com, Virginia Beach, Virginia

May 2007 — September 2008

Designed and developed websites (using Flash / ActionScript) for multiple creative agencies: Ogilvy, R/GA, Cheil, Ultra16, Rokkan, Tender Creative, Indelible, Bigger Design. Some notable brands including: ABC, Reebok, Hewlett Packard, Carnival Cruises.

Education

BFA, Old Dominion University, Norfolk, Virginia

September 2006 — May 2010

- BFA with a focus on graphic and UX design

AA, Tidewater Community College, Virginia Beach, Virginia

- AA with focus on Graphic and UI/UX Design

University Of the Arts, Philadelphia, PA

- Multi-media/ film studies
